TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, Python, C++

Frameworks & Tools: Next.js, Vue.js, Laravel, Tailwind CSS, MySQL, PostgreSQL, Firebase, Arduino, Figma

EXPERIENCE

Software Developer Intern | Department of Science and Technology – Central Luzon

Jan 2026 – May 2026

- Led frontend development for a **Flood Monitoring and Forecasting System** using Vue.js, Tailwind CSS, and Figma, integrating environmental data from Open-Meteo and Google Flood Forecasting models.
- Served as co-developer for DOST's **Operational Resource Intelligent Suite (ORIS)**, contributing to both frontend and backend development across multiple system modules.
- Developed a modernized **Payroll System** as a full-stack developer, building payroll workflows, payslip generation, and payroll computation features from the ground up.

Startup Software Developer and UI/UX Designer | Kibbler for DICT Step-Up Central Luzon

May 2025 – Nov 2025

- Developed an IoT-based embedded system **Smart Pet Feeder** using Arduino, React Native, PHP, Firebase Realtime Database for real-time device communication and feeding automation.
- Designed the UI/UX of Kibbler's mobile and web interfaces in Figma, including interactive prototypes and product branding materials.
- Selected as one of the Top 10 startups for the 4-month DICT StepUp incubation program, where the project underwent mentorship, validation, and startup development activities.

Freelance Web Developer

Mar 2025 – May 2025

- Developed a **Restaurant Ordering and Reservation System** with real-time order tracking, PayMongo payment integration, and role-based access management.
- Built multi-role workflows for customers, employees, and administrators, including reservation handling, payment processing, order management, and status monitoring features.

PROJECTS

Kibbler – Smart Pet Feeder (PHP, CSS, Firebase, React Native, C++, Arduino)

May 2025 – Nov 2025

- Developed an IoT-driven pet feeder with solar power, RFID-based dispensing, and weight-sensor monitoring.
- Built a mobile app using React Native and Firebase with feeding logs, notifications, analytics, and pet registry.
- Built a PHP web dashboard for feeding logs, analytics, notifications, and pet management.

ToothTrackr – Dental Scheduling and Records System (JavaScript, PHP, CSS, MySQL)

Oct 2024 – Apr 2025

- Developed a multi-role system with appointment booking, calendar view, and notifications.
- Implemented dental records, informed consent and medical history tracking.

Yeobooth – Online Photobooth with AR Filters (TypeScript, Tailwind CSS, Python)

Sep 2025 – Nov 2025

- Built a web-based photobooth which allows users to take pictures and choose frames and layouts.
- Implemented AR filter functionality for real-time photo enhancements and effects.

EDUCATION

Our Lady of Fatima University, B.S. in Information Technology, 4th year

Aug 2022 – Jul 2026

GWA: 1.19 – Consistent Dean's Lister with Cum Laude Standing

CERTIFICATES

Meta Front-End Developer • IBM Front-End Development with Figma, Bootstrap & Git • Google IT Support • Google Data Analytics • Cisco Python Essentials • Cisco Introduction to Networks • Cisco Introduction to Data Science • Cisco Introduction to Cybersecurity • FreeCodeCamp Responsive Web Design
